

Contents of issue 2-3 vol. XLIX

- 115 *Foreword*
- 117 P. J. PRENDERGAST, *An analysis of theories in biomechanics*
- 135 S. TOKARZEWSKI, J. J. TELEGA, A. GALKA, *Torsional rigidities of cancellous bone filled with marrow: the application of multipoint Padé approximants*
- 155 T. LEKSZYCKI, *On a class of bone cell-based remodelling laws with spatial fading influence of stimuli*
- 165 J. LITNIEWSKI, A. NOWICKI and A. SAWICKI, *Bones characterisation with ultrasound*
- 179 J. KUBIK, M. KACZMAREK and M. PAKUŁA, *On observation of slow ultrasonic waves in cancellous bones*
- 191 L. SKUBISZAK, L. KOWALCZYK, *Relation between the mechanical properties of muscles and their structure on the molecular level*
- 213 S. JEMIOŁO and J. J. TELEGA, *Modelling elastic behaviour of soft tissues. Part I. Isotropy*
- 241 S. JEMIOŁO and J. J. TELEGA, *Modelling elastic behaviour of soft tissues. Part II. Transverse isotropy*
- 283 A. GALKA, J. J. TELEGA and R. WOJNAR, *Modelling electric and elastic properties of cartilage*
- 315 E. SZWAJCZAK, A. KUCABA-PIĘTAL, J. J. TELEGA, *Liquid crystalline properties of synovial fluid*
- 359 A. ŚLÓSZARCZYK, *Significance of bioceramics for bone surgery*
- 375 S. PISZCZATOWSKI, K. SKALSKI, *Visco-elastic analysis of the femur-implant system by using finite element approach*
- 395 D. JASIŃSKA-CHOROMAŃSKA, *Computer modelling and simulation techniques as a tool for aiding the design of orthopaedic unilateral external fixators - focused on innovative solutions*
- 417 J. BAUER and M. PYRZ, *Evolutionary programs in the optimization of cementless hip prosthesis*
- 431 T. KOTWICKI, W. MARCINIAK, *Optimal three-dimensional correction of idiopathic scoliosis*
